FLX SHADE

Easy Aid To Shade

The patent pending FLX Shade™ system uses our patented flex pole technology. The flex pole provides the load tension, minimizing all the cumbersome hardware needed to tighten traditional sail shades. FLX Shades™ are configurable by length, pitch and height as well as come in over 30 colors.

We can create shade almost anywhere. The FLX Shade™ system can easily create shade for your guests to enjoy at theme parks, queuing areas, commercial spaces, resorts, sport centers, outdoor museums to everything else in between. The FLX Shade™ system can withstand high wind loads and harsh, outdoor weather. Our above ground anchor options make the FLX Shade™ installation a breeze! We also offer one of the best warranty options on the market, up to 10 years on Sails, 10 years on structure and a limited 10 years on the flex poles.

FLX SHADE

Easy Aid To Shade

FLX SHADE™ - Easy Aid To Shade

The FLX Shade™ system offers unlimited layouts, easily blending in with natural environments, while also providing maximum shade potential. The small flexible poles, just 2 inches in diameter, minimize the amount of structure needed. Up to 50% less in structure is used to install the FLX Shade. Create aesthetically pleasing shade that provides focal points on designated areas, not blockades, throughout a park.

Sample Layout

FLX SHADE™ - Optional Above Ground Mounts

Above ground options available with the FLX Shade™ mounts. FLX Shade™ mounts designed to easily install into concrete with expansion bolts (comes included with hardware). Above ground option is designed to not impact existing infrastructure below ground, such as electrical and water lines. Flex poles easily slide into mounts for shade set up. 15 degree angled above ground mount shown in photo.

FLX SHADE

The anatomy of great shade

SAILS

The FLX Shade™ system can utilize various sail shapes, sizes and grades. Sails are available in over 30 colors and two-tone options.

END CAPS

The flex poles can come equipped with endcaps.

ADJUSTABLE CLAMP AND CHAIN LINK

The included clamp and chain link kit can be adjusted to easily distance the sails and set the desired angles with the flex poles.

FLEX POLE TECHNOLOGY

The patented flex pole technology provides the load tension, minimizing all the cumbersome hardware typically needed to tighten the sail shades.

ABOVE GROUND MOUNTS

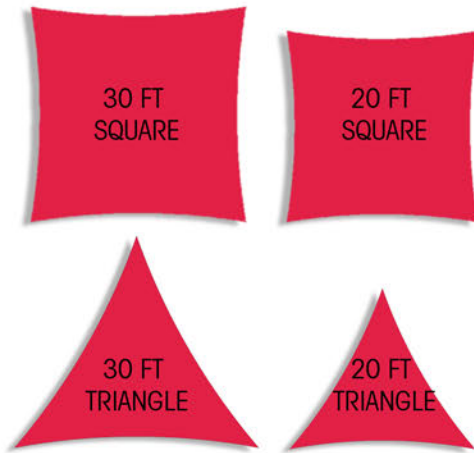

The FLX Shade™ system offers optional above ground steel mounts. The steel mounts can be easily installed above concrete with anchor bolts (included). Flex poles can easily slide out of the mounts when not in use.

FLX SHADE

FLX SHADE™ - Standard Sizes

The FLX Shade™ offers 4 standard sail sizes, with custom options available.

FLX SHADE™ - Sail Colors

The FLX Shade™ offers over 30 sail colors, using the highest grade materials on the market. The sail material is a perfect balance between weight and UV protection. It is also slightly stretchable, making it tear, rot and fray resistant. The sails come with a standard 10-year warranty against UV degradation and are 100% recyclable. Two-tone options are also available. Here are just some of the standard, vibrant colors to select from:

FLX SHADE™ - Technical Data

- Warranty: 10 years on sails, 10 years on structure and flex poles.
- Flooring Types: Concrete, steel and other surfaces after evaluation.
- Below Ground Install: Only 3 feet for steel sleeve inserts, 8 to 10 inch radius for concrete piling.
- Above Ground: 5 inches minimum of concrete thickness for above ground mounts.
- Max Pole Lengths Included: 12 feet.
- How Many Sails To A Single Pole: 2 sail corners per pole.
- Max Wind Load: 70 MPH (112 KM/H).
- Max Span For Sails: 30 feet.
- Pole Distances For Sails: 12 inches at each corner.
- Flex Pole diameter: 2 inches.
- Installation: We offer installation or the sails can be self-installed.

We provide the best to the best in the world!

Here are just some of our clients:

Extreme Legacy continues to invent forward in the amusement industry celebrating the inventor who earned the unprecedented honor of achieving "Best New Product" 5 years in a row and 18 amusement industry awards, including several "Best Major Attractions." The original inventor also received awards in several other categories such as "Best Technology Applied," "Best Major Theme Park Ride," and "Best Exhibit."

We are the leaders in family-friendly thrills. All of our products are family-friendly focused, providing attractions fun for all ages.

WHY CHOOSE US?

- ✓ Engineering at its best. All products meet ASTM standards.
- ✓ Quality and Safety comes naturally, We invent forward.
- ✓ We work with the big guys. Our client lineup speaks for itself.
